Contents Volume 48, 2001

VOL. 48, NOS. 1–2

Research papers

Model coupling intraparticle diffusion/sorption, nonlinear sorption, and biodegradation processes
H.K. Karapanagioti, C.M. Gossard, K.A. Strevett, R.L. Kolar and D.A. Sabatini 1

Analyses of locally measured bromide breakthrough curves from a natural gradient tracer experiment at Krauthausen
J. Vanderborght and H. Vereecken 23

Biosurfactant-enhanced solubilization of NAPL mixtures
J.E. McCray, G. Bai, R.M. Maier and M.L. Brusseau 45

Eulerian derivation of the fractional advection–dispersion equation
R. Schumer, D.A. Benson, M.M. Meerschaert and S.W. Wheatcraft 69

A functional relation for field-scale nonaqueous phase liquid dissolution developed using a pore network model
L.A. Dillard, H.I. Essaid and M.J. Blunt 89

Stochastic-convective transport with nonlinear reaction and mixing: application to intermediate-scale experiments in aerobic biodegradation in saturated porous media
T.R. Ginn, E.M. Murphy, A. Chilakapati and U. Seeboonruang 121

Dimension reduction and source identification for multispecies groundwater contamination
C.J. Duffy and D. Brandes 151

Determining effective interfacial tension and predicting finger spacing for DNAPL penetration into water-saturated porous media
J.E. Smith and Z.F. Zhang 167

Book review

Characterisation and Measurement of the Hydraulic Properties of Unsaturated Porous Media, Part 1 and Part 2
M. Deurer. 185

VOL. 48, NOS. 3–4

Research papers

Evaluating non-equilibrium solute transport in small soil columns
S.K. Kamra, B. Lennartz, M.Th. Van Genuchten and P. Widmoser 189

On the behavior of approaches to simulate reactive transport
M.W. Saaltink, J. Carrera and C. Ayora 213

A model of oscillatory transport in granular soils, with application to barometric pumping and earth tides
D.A. Neeper 237

Modeling solute diffusion in the presence of pore-scale heterogeneity: method development and an application to the Culebra dolomite Member of the Rustler Formation, New Mexico, USA
S.W. Fleming and R. Haggerty 253
On the selection of primary variables in numerical formulation for modeling multiphase flow in porous media
Y.-S. Wu and P.A. Forsyth 277
Temporal changes in kerosene content and composition in field soil as a result of leaching
I. Dror, Z. Gerstl and B. Yaron 305
Surfactant enhanced recovery of tetrachloroethylene from a porous medium containing low permeability lenses 1. Experimental studies
T.P. Taylor, K.D. Pennell, L.M. Abriola and J.H. Dane 325
Surfactant enhanced recovery of tetrachloroethylene from a porous medium containing low permeability lenses 2. Numerical simulation
K.M. Rathfelder, L.M. Abriola, T.P. Taylor and K.D. Pennell 351
